

Examination preparation and enrolment

Prepare the correct syllabus requirements

Choose and prepare pieces from the correct syllabus and Grade book; and technical requirements from the correct Technical workbook for the relevant grade.

Choose the most suitable examination session

Candidates should be prepared to sit from the first day of a session. Ensure the session doesn't conflict with any other dates (i.e. school exams, sport, religious fixtures). Ensure accompaniment (if needed) is also available.

Enrol in examination

Enrol in the chosen session! Ensure you enrol in the correct subject; and provide all the correct candidate information on enrolment.

View the Enrolment Checklist for further detail.

Confirmation of enrolment

Check details are correct in the confirmation of enrolment. Ensure the enrolment does not require amending. If the enrolment does need amending, completion of a 'Change of Enrolment' form and payment of a fee may be required.

Examination advice

AMEB Qld endeavours to release examination information approximately three weeks before the date of the exam. Teachers must check and forward on any exam advices and candidate slips to candidates/parents; notifying them of the exam date and time.
